AOS News

Migrants in Passage

Innovative new tools, particularly light-level geolocators and increasingly small satellite transmitters, have improved our understanding of bird migration. But much remains to be learned about the fascinating ordeal of migration. In this Joint Collection, we highlight recent papers from *The Auk* and *The Condor*.

**Bird Song**

A major area of ongoing interest in ornithology is the development, production, and function of avian vocalizations and sonations. Here, we overview the literature on avian vocalizations that has been published in *The Auk* and *The Condor* over the past 5 years.

**Invasive Species**

In this Joint Special Collection, we selected recent publications from *The Auk* and *The Condor* that clarify the functional underpinnings and elucidate conservation implications of invasion biology.

The Auk: Ornithological Advances
This list of birds of Pennsylvania includes species documented in the U.S. state of Pennsylvania and accepted by the Pennsylvania Ornithological Records Committee (PORC). As of July 2012, there were 420 species on the official list. Of them, 90 are classified as accidental, 36 are classed as casual, six have been introduced to North America, two are known to be extinct and another might be, and two have been extirpated. An additional nine species are classed as provisional; eight of them are also It was named the state bird of Pennsylvania in 1931. In the early part of the 1900s, the bird was at a peak population in the state. It thrives in brushy areas at the edge of forests, and where new growth is beginning after logging. By the early 1900s, all the old growth timber in Pennsylvania had been cut, so forest areas with small trees and lots of brush were common. At the end of that century, the forests of Pennsylvania were more mature so the ruffed grouse, while still common, was not as dominant among forest birds as it had once been. Ad. Adult grouse usually weigh 17 to 25 ounces (about Pennsylvania Bird identification. Learning to identify the birds you see is a fun and rewarding experience. If you are a novice at identifying birds we have several options for you. Nifty Fifty Guides: Our Nifty Fifty Guide to the Birds of Pennsylvania is available on-line and in print. It contains 25 common backyard birds and 25 additional common birds found in
